Release Information

Release Version: 17.08.2

Date of Release: September 14th, 2017

Introduction

This document describes the features and functionality of the BIGCenter 17.08.2 release. Enhancements have been delivered for the Leases and Projects modules.

Ideas for improving BIGCenter

We invite you to submit enhancement requests on the BIGCenter Ideas page, visible to both internal Accruent employees and Support Contacts for other BIGCenter customers. You can now vote for or against these ideas, add or respond to comments, and view the status of all ideas.

This direct feedback allows Accruent to gain visibility into what is meaningful to customers. Product Management actively monitors the Ideas board, adds comments, and updates the status of ideas as needed.

Please contact BIGCenter Support for any questions about Ideas.

Features & Enhancements

Journal Entries dialog added to Accounting Entries record

The **Manage Accounting Entry** dialog in the **Accounting Entries** detail section of the **Leases** module has a new dialog called **Journal Entries**. This dialog shows you all journal entries for an accounting entry, including any changes due to remeasurement. This dialog will appear above the **Comments** dialog.

Accounting Term Start Date can now use Current Commencement Date

Previously, the system only allowed the Original Commencement Date to be used for the Accounting Term Start Date. Due to a customer request, we have now created the option to instead use the Current Commencement Date for the Accounting Term Start Date. To enable this feature, contact your Account Manager.

Issues Resolved with this Release

Component	Summary
Leases	• Users reported long lag times when trying to view the **Income & Expenses** detail section while using Internet Explorer 11. This issue occurred when there were a large number of records in the **Income & Expenses** detail section. • The system no longer lags when using Internet Explorer 11.
Leases	• Users reported that they cannot see the Vendor Site Code after creating a contact for a lease in Monarch. • The Vendor Site Code now appears as expected in the Contact record.
