Release Information

Release Version: 18.05.1

Date of Release: May 24, 2018

Introduction

This document describes the features and functionality of the BIGCenter 18.05.1 release. Enhancements have been delivered for the **Leases** workspace, the **Purchase Orders** workspace, and **Report Center**.

Ideas for improving BIGCenter

We invite you to submit enhancement requests on the BIGCenter Ideas page, visible to both internal Accruent employees and Support Contacts for other BIGCenter customers. You can now vote for or against these ideas, add or respond to comments, and view the status of all ideas.

This direct feedback allows Accruent to gain visibility into what is meaningful to customers. Product Management actively monitors the Ideas board, adds comments, and updates the status of ideas as needed.

Please contact BIGCenter Support for any questions about Ideas.

Summary of Issues Fixed and Additional Enhancements

Component	Summary
General	You can now search for a person using their **Person ID** in any type-ahead field that searches for person information. You can also add a new **Person ID** column to the **Contacts** detail section in the **Leases** workspace.
Leases	The **Floors** field is now editable from the **Summary** detail section.
Leases	A new object attribute has been created for the **Accounting Entry Details** modal window. When activated, this object attribute enables a **Cost Center** field in the **Base** detail section of the modal window. This field allows users to reference the cost center that an accounting entry should be assigned to. This field is information-only.
Leases	**Issue:** The **Rentable Area** field in the **Premises** detail section did not display any decimal values. **Resolution:** The **Rentable Area** field in the **Premises** detail section now displays and allows up to a 4-digit decimal value for entry.
Leases	**Issue:** The **SOX Audit** report was not pulling changes made in several detail sections of the upgraded version of the software. **Resolution:** The **SOX Audit** report now pulls changes made in the upgraded version of the software.
Leases	**Issue:** The **Comment Type** field was not appearing on lease abstracts. **Resolution:** The **Comment Type** field now appears on lease abstracts.
Leases	**Issue:** The **Allocation Type** drop-down menu in the **Leases** > **Allocations** > **Set Allocation Type** modal window was not displaying all available options. **Resolution:** All allocation types now appear in the **Allocation Type** drop-down menu.

Component	Summary
Leases	**Issue:** The **My Leases** collection was not displaying lease records as expected. **Resolution:** The **My Leases** collection displays all lease records where the user abstracted the lease or is an active lease contact.
Purchase Orders	A new **PO Total** line has been added to the **Line Items** detail section. This line allows you to see the grand total of all line items currently associated to the purchase order without having to navigate back to the **Summary** detail section.
Purchase Orders	Purchase order line items now pre-populate with the general ledger assigned at the project-level. The **General Ledger** field will still be editable at the purchase order-level.
Purchase Orders	**Issue:** Previously, change orders could be selected and printed when viewing a linked change order collection. Change orders should not be allowed to print individually, as change orders appear when printing the parent purchase order. **Resolution:** The **Toggle Multi-Select** action and **Print** action are disabled when viewing a linked change order collection.
Report Center	**Issue:** The **Purchase Order** report was displaying the AP System description rather than the AP System Code or description. **Resolution:** Users can now select whether to view the AP System Code or description on the **Purchase Order** report.
Report Center	**Issue:** The **Locations Summary** report was not pulling leases that did not include a value in the **State** field. **Resolution:** The **Locations Summary** report now pulls all leases, including those without a state listed.
