Release Information

Release Version: 18.05.3

Date of Release: June 21, 2018

Introduction

This document describes the features and functionality of the BIGCenter 18.05.3 release. Enhancements have been delivered for the **Building Manager** workspace, the **Leases** workspace, the **Legacy Portal**, the **Purchase Orders** workspace, **Report Center**, and the **User Manager** workspace. Additionally, the **Documents** detail section for all workspaces can now be sorted by several values, and action items can be cloned and included in templates for the **Projects** and **Transactions** workspaces.

Ideas for improving BIGCenter

We invite you to submit enhancement requests on the BIGCenter Ideas page, visible to both internal Accruent employees and Support Contacts for other BIGCenter customers. You can now vote for or against these ideas, add or respond to comments, and view the status of all ideas.

This direct feedback allows Accruent to gain visibility into what is meaningful to customers. Product Management actively monitors the Ideas board, adds comments, and updates the status of ideas as needed.

Please contact BIGCenter Support for any questions about Ideas.

Documents Detail Section Now Allows Sorting

The **Documents** detail section now allows sorting by several values. This enhancement makes it easier for users with larger leases to locate documents.

You can now sort the documents in all **Documents** detail sections by:

- **Name** – Alphabetic and reverse-alphabetic order
- **Created Date** – Newest and Oldest Date
- **Modified Date** – Newest and Oldest Date
- **ID** – Smallest and Largest

The sort order cascades from folders to documents within the folders. For example, sorting by a **Name** will sort all folders into alphabetic order, and then all documents within each folder in alphabetic order. The folder structure of the **Documents** detail section will remain the same.

To sort the **Documents** detail section, follow the steps below:

1. Open the appropriate workspace.
2. Select a record in the workspace.
3. Select the **Documents** detail section from the **Detail Section** menu.
4. Hover your mouse over the **Name**, **Created**, **Modified**, or **ID** columns of the header bar. The **Sort** button will appear.

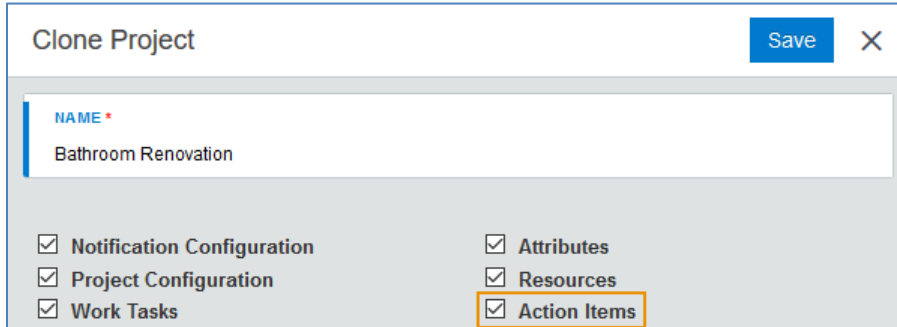

Sort button.

5. Click the **Sort** button to cycle through the sort options.

Action Items Can Now Be Cloned and Included in Templates

Users now have the ability to clone action items when cloning a project or transaction. Additionally, action items can also be added to project or transaction templates. This enhancement means that users won't have to add the same action items repeatedly when creating similar projects.

Clone Project Modal Window, with Action Items check box boxed in orange.

The following attributes of action items will be cloned and stored in templates:

- **Name**
- **Description**
- **Type**
- **Priority**
- **Created By** – defaults to the person who is creating or cloning the project or transaction
- **Status** – defaults to **Open**

Summary of Issues Fixed and Additional Enhancements

Component	Summary
General	**Issue: Date Pickers** jumped to saved dates or dates picked using the date picker, but not to dates typed in the **Date** field. **Resolution: Date Pickers** jump to saved dates, dates picked using the date picker, and dates typed in the **Date** field.
Building Manager	**Issue:** The **Latitude** and **Longitude** fields were not auto-populating based upon the address. Also, the **Status** field was not saving. **Resolution:** The **Latitude**, **Longitude**, and **Status** fields function as expected.
Leases	**Issue:** The value of the **Space Use** field was not being carried over from the **Summary** detail section to the **Edit** page for certain leases. **Resolution:** The current value of the **Space Use** field appears on the **Edit** page.
Leases	**Issue:** When the object attribute PREMISEFORM,ASP OCCUPANT VISIBLE was deactivated, the **Occupant** field was still displaying as an option in the **Configure Grid Settings** modal window. **Resolution:** The **Occupant** field no longer displays as an option in the **Configure Grid Settings** modal window if the PREMISEFORM,ASP OCCUPANT VISIBLE object attribute is deactivated.
Leases	**Issue:** The system was not allowing the **Premises** drop-down menu to open after adding three premises to a cost in the **Income & Expenses** detail section. **Resolution:** The **Premises** drop-down menu opens regardless of how many premises have been added to a cost.
Leases	**Issue:** Documents that display on a lease in **Portfolio Center** were not displaying in the **Documents** detail section of the **Leases** workspace. **Resolution:** Documents that display on a lease in **Portfolio Center** display in the **Documents** detail section of the **Leases** workspace.

Component	Summary
Leases	**Issue:** Users were unable to delete documents that did not have a value in the **Document Type** field. **Resolution:** Users can delete documents regardless of whether the document has a value in the **Document Type** field.
Leases	**Issue:** When printing an original accounting entry after a re-measurement had been performed, the original accounting entry was displaying the value of the **Reasonably Assured** field for the re-measured accounting entry. **Resolution:** The **Print** view of the original accounting entry displays the value of the **Reasonably Assured** field entered on the original accounting entry.
Legacy Portal	Emails generated from work requests created in the portal now include the legacy building code if the BUILDING_FORM.ASP/LEGACYBLDGCODE object attribute is enabled.
Purchase Orders	A new object attribute has been added that allows the general ledgers for line items on a purchase order to be visible on the **Print** view. This object attribute is REQUISITION_MANAGEMENT\CAN_VIEW_GENERAL_LEDGER_ON_PRINT . Additionally, a new **Include Allocations** check box has been added to the **Print Purchase Orders** action dialog box. Selecting this check box toggles the **Allocation Items** for the purchase order to display in **Print** view.
Report Center	**Issue:** A critical error was preventing the **Facility Manager Dashboard** from running. **Resolution:** The **Facility Manager Dashboard** opens as expected.
Report Center	**Issue:** The **Service Provider Workload** report would not generate. **Resolution:** The **Service Provider Workload** report generates as expected.
User Manager	**Issue:** The system was not displaying the **Address 2** field in the **Summary** detail section of the **User Manager** workspace. **Resolution:** The system displays the **Address 2** field in the **Summary** detail section of the **User Manager** workspace.
