Release Information

Release Version: 18.06.2

Date of Release: July 19, 2018

Introduction

This document describes the features and functionality of the BIGCenter 18.06.2 release. Enhancements have been delivered for the **Leases** workspace, the **Projects** workspace, and **Report Center**.

Ideas for improving BIGCenter

We invite you to submit enhancement requests on [the BIGCenter Ideas page](#), visible to both internal Accruent employees and Support Contacts for other BIGCenter customers. You can now vote for or against these ideas, add or respond to comments, and view the status of all ideas.

This direct feedback allows Accruent to gain visibility into what is meaningful to customers. Product Management actively monitors the Ideas board, adds comments, and updates the status of ideas as needed.

Please contact BIGCenter Support for any questions about Ideas.

Summary of Issues Fixed and Additional Enhancements

Component	Summary
General	<p>Users can now sort using the Document Date and Type columns in the Documents detail section. The Document Date column can be sorted by newest-oldest or oldest-newest, while the Type column can be sorted in alphabetic or reverse-alphabetic order.</p>
General	<p>Issue: Sorting was not working correctly in regards to upper-case and lower-case. Specifically, the system was sorting results in upper-case at the top of lists, while pushing lower-case results to the bottom of lists.</p> <p>Resolution: Sorting functions are now all case-insensitive.</p>
General	<p>Issue: The Market and Market Sector fields were required fields in the Building Manager workspace, Leases workspace, and Portfolio Center when they should have been optional.</p> <p>Resolution: These fields are now optional fields.</p>
Leases	<p>Issue: In Portfolio Center, users had the option to select a legal entity from the Legal Vehicle drop-down menu on the Lease Summary page. This drop-down menu was not carried over to the upgraded BIGCenter.</p> <p>Resolution: A new Doing Business As drop-down menu has been made available for the Summary detail section of the Leases workspace. Sysadmins who want to add this drop-down menu to the Leases workspace can add it by enabling the legalvehicle object attribute.</p>
Leases	<p>Issue: When some users added a new option to the Options detail section, the detail section did not display the new option. These users would need to navigate away from the lease or open a different detail section, and then return to the Options detail section to see their updated data.</p> <p>This only occurred for the first option the user attempted to add, and did not occur after the user selected a toggle view option.</p> <p>Resolution: New options added to the Options detail section will populate immediately in the Options detail section after saving.</p>

Component	Summary
Leases	<p>Issue: The system was displaying the lease allocation warning message on leases whose allocations equaled 100%. The system should only display the warning message if lease allocations do not equal 100%.</p> <p>Resolution: The system only displays the warning message if lease allocations do not equal 100%.</p>
Leases	<p>Issue: Previously, the Delete button was available for option costs that were currently being used by an approved or re-measured accounting entry.</p> <p>Resolution: If an option cost is currently being used by an approved or re-measured accounting entry, the Delete button is disabled.</p>
Leases	<p>Issue: Fields in the Options and Income/Expenses areas in both the upgraded and legacy versions of BIGCenter were not displaying the correct labels.</p> <p>Resolution: The fields in these areas now display the correct values for their labels.</p>
Projects	<p>At project creation, the Project Number field now defaults to the value of the Project ID field if the Project Number field is left blank. This setting does not impact updates to the Project Number field.</p>
Report Center	<p>Issue: The Work Request Ad Hoc report was displaying each service provider's hours as the total hours on the ticket, rather than their individual hour totals.</p> <p>Resolution: The Work Request Ad Hoc report displays each service provider with their individual hour totals, rather than the total hours on the ticket.</p>
