Release Information

Release Version: 18.07.1

Date of Release: August 2, 2018

Introduction

This document describes the features and functionality of the BIGCenter 18.07.1 release. Enhancements have been delivered for the **Company Manager** workspace, the **Leases** workspace, the **Projects** workspace, the **User Manager** workspace, and the **Work Requests** workspace.

Ideas for improving BIGCenter

We invite you to submit enhancement requests on the BIGCenter Ideas page, visible to both internal Accruent employees and Support Contacts for other BIGCenter customers. You can now vote for or against these ideas, add or respond to comments, and view the status of all ideas.

This direct feedback allows Accruent to gain visibility into what is meaningful to customers. Product Management actively monitors the Ideas board, adds comments, and updates the status of ideas as needed.

Please contact BIGCenter Support for any questions about Ideas.

Summary of Issues Fixed and Additional Enhancements

Component	Summary
Company Manager	The following filters have been added to the **Filter Panel** in the **Company Manager** workspace: • **Name** • **Address 1 / Address 2** • **City** • **State** • **Country** • **Tax Code**
Leases	**Issue:** Previously, the **Parent Cost Center** field from Legacy **Portfolio Center** did not display in the **Allocations** detail section of the **Leases** workspace. **Resolution:** A new object attribute has been created that adds the **Parent Cost Center Code** and **Parent Cost Center Description** columns to the **Allocations** detail section of the workspace. This object attribute also adds a read-only **Parent Cost Center** field to the **Add**, **Edit**, and **View Allocation** modal windows. To enable this feature, change the **LEASE** > **SHOW_PARENT_COST_CENTER** object attribute to **VISIBLE**.
Leases	**Issue:** Previously, when users attempted to cancel edits on an accounting entry, the system did not revert the values in the **Accounting Entry Details** modal window to the last saved values in the system. **Resolution:** When users cancel edits to an accounting entry, the system will refresh the **Accounting Entry Details** modal window and display the last saved values.
Projects	**Issue:** Previously, when users opened the **Change Currency** modal window in the **Request for Proposal** detail section, the **Currency** drop-down menu would display the default currency—for example, US Dollars—without indicating that this currency was the default currency for the project. **Resolution:** The **Currency** drop-down menu in the **Change Currency** modal window now displays the default currency for the project as **Default**, so that users can clearly see whether the default currency is currently selected.

Component	Summary
User Manager	The following filters have been added to the **Filter Panel** in the **User Manager** workspace: • **Company** • **Name** • **Address 1 / Address 2** • **City** • **State** • **Country** • **Vendor ID** • **Vendor Site Code** • **Person Code**
Work Requests	**Issue:** In situations where a work request was deferred prior to being completed, the system was not creating a completion event in the event log. **Resolution:** A completion event is created by the system when a work request is moved from **Open** to **Completed** status.
