Release Information

Release Version: 18.10.2

Date of Release: November 8, 2018

Introduction

This document describes the features and functionality of the BIGCenter 18.10.2 release. Enhancements and fixes have been delivered for the **Leases** workspace, **Portfolio Center**, the **Project Initiation** workspace, the **Projects** workspace, reports, and the **Work Requests** workspace.

Additionally, the process for generating PDFs in Legacy has changed in this release.

Ideas for Improving BIGCenter

We invite you to submit enhancement requests on the [BIGCenter Ideas page](#), visible to both internal Accruent employees and Support Contacts for other BIGCenter customers. You can now vote for or against these ideas, add or respond to comments, and view the status of all ideas.

This direct feedback allows Accruent to gain visibility into what is meaningful to customers. Product Management actively monitors the Ideas board, adds comments, and updates the status of ideas as needed.

Please contact BIGCenter Support for any questions about Ideas.

Legacy PDF Output Update

There is a new update to how Legacy PDF output is generated. When you click the **PDF** button in Legacy, the page will open in a new tab on your browser. A **Print** dialog box will open, giving you the option to print the page or to convert the page to PDF format using your PDF conversion software.

If you want to continue creating PDFs, we recommend that you acquire PDF conversion software. If you are a Windows 10 or Mac OSX user, your system should already have integrated Print to PDF functionality. This change will not impact content generated in the upgraded version of BIGCenter.

Please contact your account representative if you have any questions.

Summary of Issues Fixed and Additional Enhancements

Component	Summary
Leases	<p>Issue: Users found that using the Cost Center filter in the Filter Panel did not return leases that were associated with the selected cost center.</p> <p>Resolution: The Cost Center filter returns leases associated with the selected cost center.</p>
Leases	<p>Issue: The system was displaying error messages from one detail section of the Accounting Entries modal window after the user had navigated to another detail section. Additionally, the system did not clear the data from the Asset ID field after the user canceled their changes.</p> <p>Resolution: The Accounting Entries modal window only displays error messages in the detail section where the error occurred. Additionally, the system clears the Asset ID field after the user cancels their changes.</p>
Portfolio Center	<p>Issue: When a user clicked the Scope Agreement button, the system returned an error that read, <i>We are sorry that you may be having trouble with our site. Technical support has been notified and will work to resolve this issue. You may wish to try your request at a later time.</i></p> <p>Resolution: Scope agreements are generated without returning this error message.</p>
Project Initiation	<p>Issue: Previously, after a user created a project initiation request, the system was directing users to the Programs workspace.</p> <p>Resolution: The system no longer directs users to the Programs workspace after creating a project initiation request.</p>

Component	Summary
Projects	<p>Issue: The system was allowing negative values for line items when creating budgets.</p> <p>Resolution: The system no longer allows negative values for budget line items.</p>
Reports	<p>A new Project Allocated Requisitions report has been created. This report is based on the Project Requisition report, but it displays the allocated amount per index in the Requisition Amount column.</p>
Work Requests	<p>Issue: The system was not returning results when a user attempted to filter by floor with building information. Additionally, the system would only allow the user to filter by one floor at a time.</p> <p>Resolution: You can now filter by multiple floors, and you can also filter by multiple floors in the same building. You do not need to filter by a building to search by floor.</p>
