Release information

Release Version: 19.03.2

Date of Release: April 11, 2019

Introduction

This document describes the features and functionality of the BIGCenter 19.03.2 release. Enhancements and fixes have been delivered for the **Accounting Period Manager** workspace, **Building Manager** workspace, **Leases** workspace, and **Reports**.

Ideas for improving BIGCenter

We invite you to submit enhancement requests on the [BIGCenter Ideas page](#), visible to both internal Accruent employees and Support Contacts for other BIGCenter customers. You can now vote for or against these ideas, add or respond to comments, and view the status of all ideas.

This direct feedback allows Accruent to gain visibility into what is meaningful to customers. Product Management actively monitors the Ideas board, adds comments, and updates the status of ideas as needed.

Please contact BIGCenter Support for any questions about Ideas.

Fix for legacy report formatting

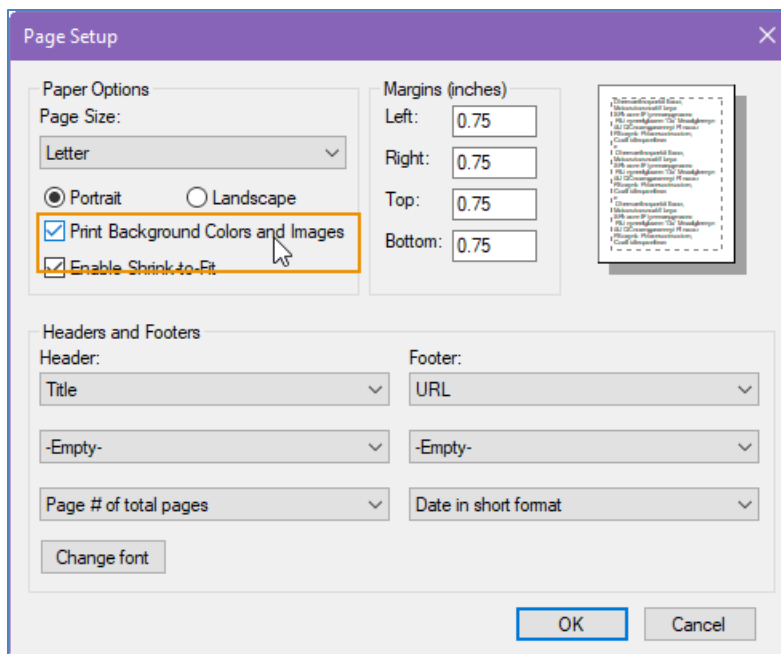

After the change to the way legacy BIGCenter handled PDF outputs, some legacy reports needed to be reformatted. The new report format no longer had banded rows present in legacy outputs.

Additionally, some reports had too much white space between the header rows and the report data.

The excess white space between the header and the report data has been removed. The banded rows display in Firefox or Chrome by default, but they are not supported in Microsoft Edge. In order to print the banded rows in Internet Explorer, you must first enable a setting in your browser.

If you are printing from Internet Explorer, follow these steps to enable banded rows:

1. Click the **File** menu.
2. Select **Page Setup** from the drop-down menu that appears.
The **Page Setup** modal window opens.
3. Select the **Print Background Colors and Images** check box.

Page Setup modal window.

4. Click the **OK** button.
5. Print the report.

Summary of issues fixed and additional enhancements

Component	Summary
Accounting Period Manager, Leases	<p>Issue: Previously, you could still delete an accounting entry for a period even after the period had been closed in the Accounting Period Manager.</p> <p>Resolution: You can no longer delete an accounting entry for a period after the period has been closed.</p>
Building Manager	<p>Issue: The legacy Use field was not pulled over to the Building Manager workspace in the upgraded software.</p> <p>Resolution: The Use field now appears in the Summary detail section of a building record in the Building Manager workspace.</p>
Leases	<p>Issue: If a user changed the start date of a classification test when creating a re-measured accounting entry, the system would ask the user if she would like to override the original start date of the accounting entry. The classification test should not override the details of the original accounting entry unless the user is editing the original accounting entry.</p> <p>Resolution: If the user chooses to override the start date of the accounting entry, the system updates the Effective Date instead of the Accounting Term Start Date.</p>
Leases	<p>Issue: If a direct cost was added to a re-measured accounting entry, the direct cost was not included in the accounting schedule.</p> <p>Resolution: Direct costs are included in remeasured accounting schedules.</p>
Reports	<p>The Option ID field has been added to the Report Writer - Lease Options report.</p>
