Release information

Release Version: 20.01.2

Date of Release: February 6, 2020

Introduction

This document describes the features and functionality of the BIGCenter 20.01.2 release. Improvements and fixes for the Invoice, Lease and Purchase Order workspaces have been delivered.

Credit invoices now supported

You can now create credit invoices in BIGCenter. This functionality supports use cases where you might receive a refund or an incentive on an expense. To leverage this feature, you must create a negative purchase order. The logic for purchase orders is as follows:

- If the Purchase Order is positive:
  - Purchase Order + Change Order must be >= 0
  - Invoices must be > 0
- If the Purchase Order is negative:
  - Purchase Order + Change Order must be <= 0
  - Invoices must be < 0

This feature is not enabled by default. It is controlled by an object attribute. To enable this feature, contact Accruent Support.

Improvements and issues fixed

The following table contains summaries of the improvements to the product and the issues fixed in the 20.01.2 release.

Component	Summary
Leases	Lease documents from legacy can now be downloaded from the upgraded BIGCenter as expected.
