# Release information

**Release Version:** 20.11.1

**Date of Release:** December 3, 2020

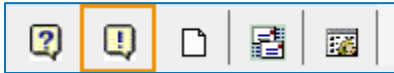

## Introduction

This document describes the features and functionality of the BIGCenter 20.11.1 release. In this release, we have delivered bug fixes to the **Leases** workspace, **Portfolio Center**, and the **Project Initiation** workspace.

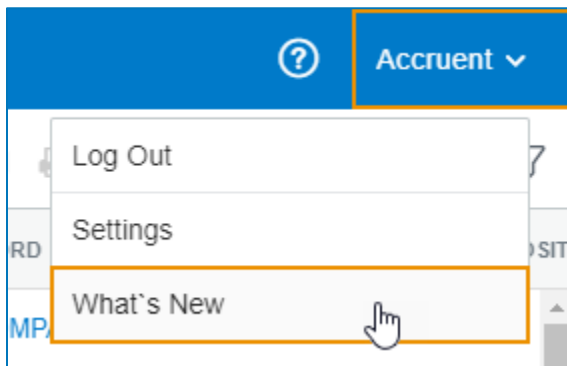

## Reminder: transition to in-app release notes only

After the **20.11.2** release coming on **December 10, 2020**, we will no longer be distributing release notes via email. Instead, you will access the release notes from within the product. This change will allow you to access the release notes at your leisure while decreasing the volume of emails you receive about the product.

In Legacy, click the **What's New** button in the footer to open the Online Help to the **What's New** page. The **What's New** button looks like a speech bubble with an exclamation point inside of it.

In the upgraded BIGCenter, select the **What's New** link in the menu in the header bar.

If you have any questions, please contact Accruent Support.

## Improvements and issues fixed

In this release, we addressed client-specific enhancement requests and bug fixes. If an enhancement or bug fix in this release impacts your instance of BIGCenter, your Accruent representative will reach out to you.

Component	Summary
Leases workspace	<p>There is a new system parameter which allows your quarterly costs to be charged in the first month of the quarter rather than the last month of the quarter.</p> <p><b>Note:</b> When enabled, this setting only applies to new accounting entries. Existing entries and remeasurements of those entries will not be affected.</p> <p>This system parameter is not enabled by default. If you would like to have this system parameter enabled, contact Support and ask them to</p>

Component	Summary
	enable the LS_FASB_QUARTERLY_OPTION_COST_PAYMENT_MONTH system parameter.
Portfolio Center	You no longer encounter a blank page when trying to access the <b>Contacts</b> tab of a lease in Chrome.
Project Initiation workspace	The <b>Project Summary</b> field labels display as expected for our FAMIS integration.
